Professional Profile

A dynamic and deeply motivated Software Engineer, driven by enthusiasm and possessing a robust background in web development, coupled with an insatiable thirst for learning. Armed with two years of hands-on experience in frontend technologies, I'm enthusiastic about making valuable contributions to pioneering projects. Proficient in HTML, CSS, JavaScript and React, and eager to further develop expertise in frameworks like Node.js, C# and other cutting-edge technologies. My strengths lie in adept problem-solving, collaborative skills, and a natural ability to adapt to fresh challenges. I'm unwaveringly committed to delivering top-notch, user-centric web applications while continually honing my skills in the realm of full-stack development.

Tech Stack

Frontend Technologies	HTML/CSS, JavaScript, Responsive Web Design, React.
Version Control	Git.
Text Editors/IDEs	Visual Studio Code, Jupyter Notebook.
Soft Skills	Communication: Effective communication and teamwork skills, collaborating with other developers, designers, and stakeholders.
